I. INTRODUCTION

I.1 Mandate and Powers of the Commission

I.1.1. The Eswatini Communications Commission is a regulatory body established in terms of the Eswatini Communications Commission (ESCCOM) Act, 2013, to regulate the electronic communications sector, including telecommunications networks and services, broadcasting services, postal services, the use and allocation of radio frequency spectrum, e-commerce, data protection and cybersecurity.

I.1.2. The Commission, in exercise of its powers to issue necessary authorisations, regulate and supervise the provision of broadcasting services and the content of those services as per the provision of section 6(c) of the Eswatini Communications Commission (ESCCOM) Act, 2013 as read with section 38(a) of the Eswatini Communications Commission Act, 2013 and section 4(2) of the Eswatini Broadcasting Act, 2023 hereby invites applications for the provision of Free-to-Air Commercial Radio Broadcasting services in the Kingdom of Eswatini from capable and interested persons (natural and juristic).

I.2 Rationale

I.2.1 This ITA is issued in line with relevant national policy objectives, to promote universal access to information, education, and entertainment through sustainable and inclusive broadcasting services.

I.2.2 In addition, this invitation is issued as part of the Commission's initiative to widen the market structure in Eswatini to promote competition, improve the quality of radio broadcasting services offered to people in Eswatini, and enable radio listeners' choice as envisaged in the Eswatini Broadcasting Act, 2023. The Eswatini Broadcasting Act, 2023, is a legislative framework that gives the Commission the mandate to ensure the development of the country's broadcasting sector and allows for the licensing of new broadcasters to diversify content.

I.2.3 The Eswatini Broadcasting Act, 2023, mainly seeks to:

I.2.3.1 Promote the provision of a diverse range of broadcasting services throughout the Kingdom of Eswatini.

I.2.3.2 Provide for the different classes of licences under broadcasting

services, namely: Public, commercial, community, subscription, subscription management broadcasting, and related services.

1.2.3.3 Provide for a clear licensing and authorisation framework for broadcasting services.

1.2.4 Broadcasting services play a significant role in the dissemination of information, education, and entertainment in the nation. The services play a crucial role in achieving a nation's development goals. As an industry on its own, broadcasting can germinate a sustainable creative industry and create employment opportunities in the Kingdom of Eswatini. Broadcasting can inform audiences about development in other sectors of the economy, thus acting as a complementary service to those developmental activities.

1.2.5 Commercial radio broadcasting services, in particular, play an important role in satisfying the content needs of a country that may not be met by other classes of television broadcasting services. Under this category, ESCCOM has not granted any commercial radio licence. This invitation to apply seeks to increase listeners choices in the radio broadcasting space.

1.3 Purpose of the Invitation to Apply (ITA)

In light of the above set out landscape within the commercial broadcasting space, the Commission hereby issues this invitation to interested parties to apply for the grant of one (1), which will be the first commercial radio broadcasting licence with national coverage.

1.4 Type of Commercial radio licence to apply for

Specifically, the type of commercial radio licence to be granted under this ITA shall be a free-to-air radio broadcasting service with national coverage for the territory of Eswatini.

1.5 Number of licenses to be issued under this ITA.

The Commission shall issue only **one (1)** commercial radio broadcasting service licence with national coverage.

1.6 Scope of the Licence

The licence to be issued shall enable the successful bidder to undertake the following: -

1.6.1 Provide a free-to-air commercial radio broadcasting service on the FM band as per the Geneva 84 Agreement and according to ITU Recommendation ITU-R BS.450-4 or any other applicable standards set out by the Commission from time to time;

1.6.2 Construct, maintain, and operate electronic communications network facilities for the purposes of distributing broadcasting services signals;

1.6.3 Construction, maintenance, and operation of and the provision of broadcasting services over:

1.6.3.1 terrestrial FM transmitter network within the territory of Eswatini;

1.6.3.2 Digital broadcast studio facilities;

1.6.3.3 Digital studio transmitter links.

1.6.4 Share infrastructure in accordance with the Electronic Communications (Facilities Sharing) Regulations, 2016.

1.7 Radio Frequency Spectrum Resources

1.7.1 As part of the licensing process, the successful bidder may apply for assignment of FM broadcasting channel/s between 87.5 – 108 MHz.

1.7.2 The number of channels to be assigned will be informed by the bidder's network plan and the availability of the channels.

2. THE LICENSING PROCESS AND INDICATIVE SCHEDULE

2.1 In considering this ITA, the Commission has adopted a three-stage process:

- **Stage 1: Licence Application.**
- **Stage 2: Application Evaluation.**
- **Stage 3: Licence Grant.**

2.2 The Application process shall be conducted in line with the following indicative timeline.
